

Alaska Fisheries Science Center

NATIONAL MARINE FISHERIES SERVICE – NOAA FISHERIES

Attention High School & College Students

Interested in Marine Biology, Fisheries Biology, or Aquaculture?

We are seeking summer interns, coop students and volunteers to work for the NOAA Fisheries Shellfish Laboratory at the Kodiak Fisheries Research Center.

Duties will be primarily in the seawater crab cultivation facility.

These duties may include-

- Feeding larval/juvenile/adult crabs
- Cleaning tanks and lab spaces
- Water quality testing and data entry
- Assist with fabrication and setting up experimental cultivation equipment and systems
- Assist with experiments such as reproductive biology, larval culture, tagging studies, pathology, microalgal culture, food preference studies, habitat preference, behavioral studies, etc.
- Special projects- could include some aspect of the above experiments or other.
